

Bettsofa. Design Alvar Aalto

The «Sofa Bed» by Alvar Aalto 1930/32

The legendary Alvar Aalto Sofa Bed allows the sofa, with one simple hand movement, to easily transformed into a comfortable bed. Since the first prototype, generations of manufacturers have made small changes to the production process. After 75 years, wb form has gone back to the original series and continues to produce the Sofa Bed in its original form in small series and with all its refined details, such as the recessed

flat-metal crossbar, the raising mechanism for the seat, the flat spring core upholstery and the textile covering with welted seams.
